

R&R Center Opens

CAMP ALPHA (Special) — Lt. Gen. William McCaffery recently cut a ribbon here to mark the opening of an all-new R&R processing terminal and mess hall. He labeled the new terminal as “the most popular facility in Vietnam,” and only wished that he “could be the first customer.”

The new R&R processing facilities were constructed at an approximate cost of \$3.5 million and include a new BEQ and an air-conditioned BOQ.
